## PROFILE

Junior Web Developer specialised in full-stack web application development, with a background in Criminology and Security that contributes an analytical mindset and a methodical approach to problem-solving. Responsible, resourceful and eager to continue growing, with a focus on the intersection of technology and cybersecurity.

## EMPLOYMENT HISTORY

### Full-Stack Developer Intern — Creartia SL

Feb 2026 – May 2026

- Developed frontend for multiple modules of a management system (login, clients, activities, calendar) using HTML5, CSS3, JavaScript, Tailwind CSS and Bootstrap.
- Implemented backend logic in PHP and Laravel, connecting with MySQL databases to handle creation, update and retrieval of records.
- Collaborated with the team using Git and GitHub for version control, code reviews and integration of changes across ~5 modules.

### Employee — Centro Confalón

Jun 2025 – Sep 2025

- Operated a digital account and sales management system to process payments and register new customers with accuracy.
- Managed inventory and product replenishment using computer systems, ensuring correct stock levels during shifts.
- Handled cash and card payments, reconciling daily transactions and resolving basic POS incidents.

### Criminology & Security Internship — Universidad de Cádiz

Nov 2023 – Jan 2024

- Data analysis and report preparation.
- Research and management of confidential information.
- Database work for the management of personal data.

## PERSONAL PROJECTS

### Summus Aeterni

Full-stack digital funeral services e-commerce platform with user authentication (Google OAuth 2.0), Stripe payment integration, cloud storage via Cloudflare R2, package configurator with financing calculator, admin dashboard, and a comprehensive test suite covering unit, functional, WCAG 2.0 accessibility and access control tests.

**Stack:** Laravel 11, PHP 8.2, Blade, Bootstrap 5, MySQL, Stripe API, Google OAuth 2.0, Cloudflare R2, Gmail SMTP
